About **WEDOWEBAPPS** AI-Integrated Software & Web Development Company

With over 10+ years of engineering expertise, WEDOWEBAPPS is a trusted AI-integrated software development partner serving clients across the USA and globally. We build intelligent web, mobile, and enterprise solutions that combine scalable architecture with data-driven automation to streamline workflows, enhance decision-making, optimize performance, and improve operational efficiency. Our cross-functional team of developers, architects, and AI specialists delivers secure, scalable, and future-ready systems aligned with long-term business goals and sustainable digital growth.

Our **Mission**

To empower businesses with intelligent digital ecosystems that drive automation, unlock actionable insights, and accelerate sustainable growth through AI-integrated engineering.

Our **Vision**

To become a globally trusted digital engineering partner known for building intelligent, scalable, and future-ready solutions that help businesses thrive in an AI-driven world.

Driving the company **Forward**

“At WEDOWEBAPPS, we take responsibility for helping businesses build smarter, scalable digital foundations. Our focus is simple: deliver intelligent, secure solutions that create measurable impact. By combining strong engineering with AI-driven innovation, we ensure our clients gain long-term value, operational efficiency, and sustainable competitive advantage.”

Pratik Patel
Co-founder & CEO

“At WEDOWEBAPPS, our focus is on ensuring every technology investment delivers measurable business value. Our responsibility is to align intelligent engineering with strategic objectives, helping organizations streamline operations, reduce complexity, strengthen performance, and scale confidently in an increasingly competitive digital landscape.”

Milan Soni
Director of Sales

Why Choose Us

At WEDOWEBAPPS, we combine innovation with intelligent engineering to deliver customized digital solutions precisely aligned with your business objectives. Our approach integrates AI-driven capabilities, scalable architecture, and automation-first strategies to ensure every system we build is performance-oriented, secure, and built for long-term value creation.

We go beyond traditional development by embedding intelligence into the core of digital ecosystems. Through predictive insights, workflow automation, and data-driven optimization, we help businesses streamline operations, enhance decision-making, and improve overall efficiency. Every solution is architected to scale seamlessly while adapting to evolving market demands and technological advancements.

By adhering to industry best practices, implementing robust security frameworks, and maintaining strict data protection standards, we ensure reliability at every stage of the development lifecycle. Our commitment extends beyond deployment, with continuous monitoring, performance optimization, and strategic support, we build long-term partnerships focused on measurable growth and sustainable success.

- ✓ Innovation-Driven Engineering
- ✓ AI-Integrated Solutions
- ✓ Business-Aligned Development
- ✓ Industry-Specific Expertise
- ✓ Best Practice Standards
- ✓ Robust Security & Data Protection
- ✓ Scalable System Architecture
- ✓ Automation-First Approach
- ✓ Reliable Software Delivery
- ✓ Intelligent Performance Optimization
- ✓ Continuous Post-Deployment Support
- ✓ Long-Term Strategic Growth Enablement

Our Expertise

Our Growth Story

From humble beginnings, we evolved into a trusted global technology partner, expanding from digital development to AI-integrated engineering, scalable solutions, and intelligent system design.

- 2015

Launched with a focus on scalable web solutions.
- 2016

Expanded our development team and services.
- 2017

Entered new industries and global markets.
- 2018

Delivered advanced web and mobile applications.
- 2019

Strengthened cloud and DevOps capabilities.
- 2020

Supported digital transformation initiatives.
- 2021

Introduced data-driven and automation solutions.
- 2022

Integrated AI into web and mobile platforms.
- 2023

Delivered AI-enabled performance solutions.
- 2024

Scaled enterprise partnerships globally.
- 2025

Engineering intelligent digital ecosystems.

Next-Gen AI Services

With over 10+ years of engineering experience, WEDOWEBAPPS delivers AI-integrated digital solutions to clients across the USA and global markets. We combine intelligent automation, scalable architecture, and data-driven systems to streamline operations, strengthen decision-making, and enhance customer experiences. From AI model integration to full-scale web and mobile application engineering, we build secure, high-performance platforms designed for scalability, operational efficiency, long-term business growth, and continuous digital innovation.

Data Engineering & Analytics

Transforming structured and unstructured data into actionable insights through analytics frameworks, dashboards, and predictive intelligence systems.

UI/UX Design

Designing intuitive, user-centric interfaces supported by behavioral insights, accessibility standards, and performance-focused digital experiences.

AI & Machine Learning Development

Designing and integrating intelligent systems, predictive models, and automation solutions that enhance efficiency, accuracy, and data-driven business decision-making capabilities.

Custom Software Development

Building scalable, AI-ready software platforms tailored to business requirements, ensuring performance, security, flexibility, and long-term operational growth.

Web Application Development

Developing secure, high-performance web applications integrated with intelligent features, automation capabilities, and scalable architecture for modern businesses.

Mobile Application Development

Creating AI-integrated mobile applications that deliver seamless user experiences, real-time insights, and scalable performance across platforms.

Cloud Services & DevOps

Implementing secure cloud infrastructures, CI/CD pipelines, and scalable environments optimized for performance, automation, and operational reliability.

Quality Assurance & Testing

Ensuring system stability, security, and performance through comprehensive testing processes, automation frameworks, and continuous quality monitoring.

Driving Excellence Across Industries

eCommerce

- ✓ AI-Powered Product Recommendations
- ✓ Intelligent Demand & Inventory Forecasting
- ✓ Behavior-Driven Conversion Optimization

Construction

- ✓ Smart Project Monitoring Systems
- ✓ Predictive Resource & Cost Planning
- ✓ Real-Time Site Data Insights

Fitness

- ✓ Smart Workout & Performance Tracking
- ✓ AI-Based Health Insights
- ✓ Real-Time User Engagement Systems

Real Estate

- ✓ Automated Property & Listing Management
- ✓ Customer Insight & Behavioral Analytics
- ✓ Smart Pricing & Lead Optimization

Manufacturing

- ✓ Predictive Maintenance Systems
- ✓ Production Performance Analytics
- ✓ Intelligent Supply Chain Monitoring

Healthcare

- ✓ Intelligent Diagnostic Support Systems
- ✓ Automated Clinical Workflows
- ✓ Secure AI-Driven Patient Data Management

Entertainment

- ✓ Personalized Content Recommendations
- ✓ AI-Driven Audience Analytics
- ✓ Scalable Streaming & Media Platforms

Education

- ✓ Personalized Learning Platforms
- ✓ Student Performance Analytics
- ✓ Scalable Digital Education Systems

Travel & Hospitality

- ✓ Personalized Booking Experiences
- ✓ AI-Based Demand Forecasting
- ✓ Dynamic Pricing Optimization

Energy & Utilities

- ✓ Smart Energy Consumption Analytics
- ✓ Automated Grid & Asset Monitoring
- ✓ Predictive Maintenance & Risk Detection

What Our Client Says

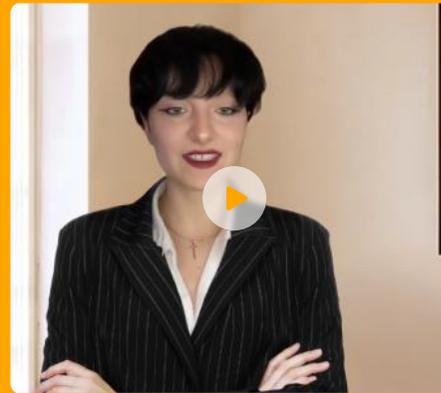

"WeDoWebApps stands out as a dependable long-term development partner. The team combines technical expertise with clear understanding, delivering well-executed solutions for projects of any complexity."

Debra Somner Fraser
Marketing, Branding and Creative Specialist

"Lisa shares their journey with WEDOWEBAPPS, from initial concept to successful app launch. Discover why they chose us, the challenges we tackled together, and the amazing results they achieved."

Lisa
Directors of iDreamers Corp

"Jackie's Journey with WEDOWEBAPPS: Unveiling Exceptional Results. Discover how our dedicated team exceeded expectations, delivering outstanding satisfaction. Explore real-life success stories that set WEDOWEBAPPS apart."

Jackie Yan
CTO, Larcoo

"We're thrilled to share a glowing testimonial from Dominique at Credit-Sweep, highlighting our impact on their online engagement and customer inquiries through our expert web and mobile app development services."

Dominique
Founder, Credit Sweep

"Our valued client, James Dever, shares their remarkable digital transformation journey. Discover how our custom web & mobile solutions transformed efficiency & engagement, from concept to launch, showcasing the tangible impact on their business success."

James Daver
Business Consultant

"Joel Davis Journey with WEDOWEBAPPS: Dispatching Made Easy. Experience how our expert team delivered remarkable results, elevating operational efficiency and satisfaction. Explore success stories that highlight WEDOWEBAPPS impact."

Joel Devis
Founder, Maximum Management Group

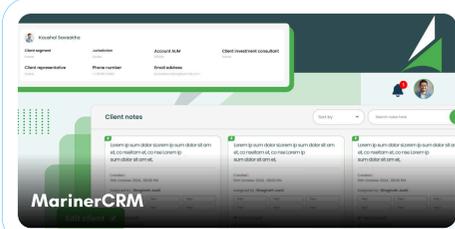

Solution

We Built!!

Our Work

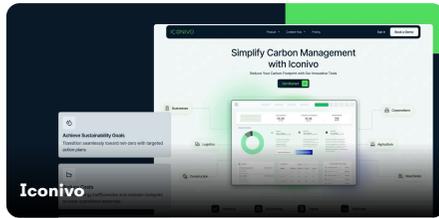

CMS Development

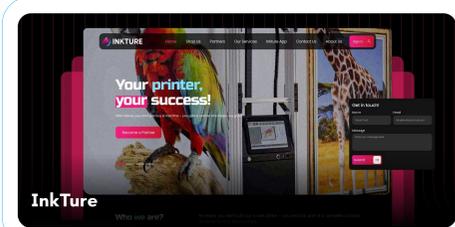

A sales CRM platform for growing businesses, built with workflow automation, intelligent segmentation, and scalable architecture to improve visibility and sales performance.

A carbon offset platform for environmentally conscious businesses, developed with secure transactions, an intuitive CMS, and a scalable architecture to streamline sustainability initiatives.

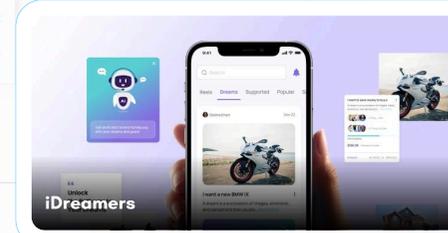

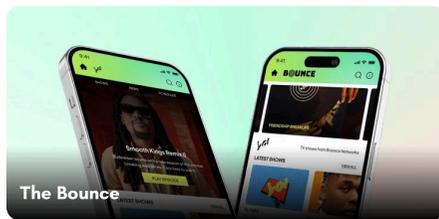

Mobile Development

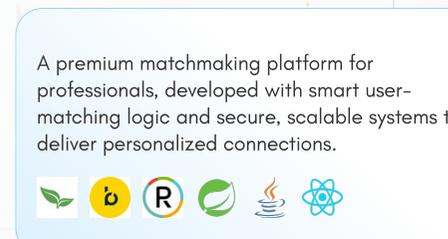

A print management platform for printing businesses, built with cross-platform integration, intelligent workflow automation, and scalable systems to improve operational efficiency.

A digital media platform for creative communities, developed with scalable architecture, real-time content management, and optimized performance to enhance user engagement.

A goal-tracking mobile app for aspiring individuals, built with intelligent engagement features and scalable architecture to support structured personal growth.

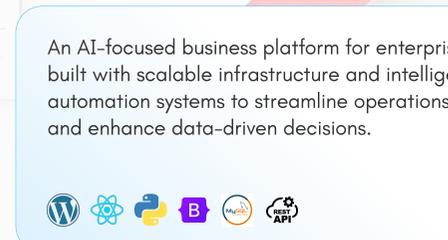

A premium matchmaking platform for professionals, developed with smart user-matching logic and secure, scalable systems to deliver personalized connections.

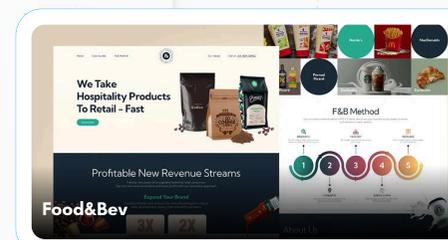

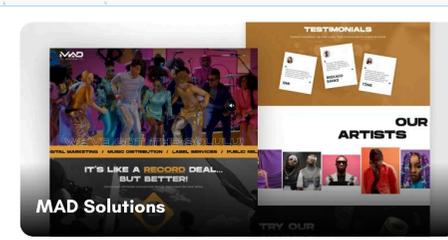

Bookings Africa is a mobile-first marketplace connecting brands and influencers through real-time discovery, booking, and scalable platform management.

Software development

An AI-focused business platform for enterprises, built with scalable infrastructure and intelligent automation systems to streamline operations and enhance data-driven decisions.

A digital publishing platform for the food and beverage industry, developed with structured content management and scalable performance to improve audience engagement.

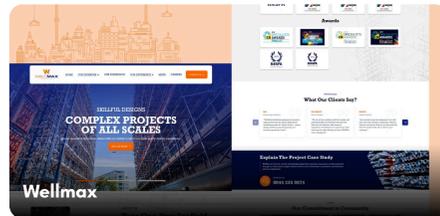

A service management platform for construction businesses, built with streamlined navigation and scalable systems to improve online visibility and lead generation.

An international hair extension eCommerce store, developed with secure transactions and scalable architecture to support global sales growth.

A healthcare service platform for medical providers, developed with secure data handling and scalable architecture to enhance patient communication and engagement.

A custom cake ordering eCommerce platform, built with streamlined ordering workflows and scalable systems to improve customer experience and sales.

A healthcare support platform for care providers, built with an intuitive design and secure systems to improve accessibility and service delivery.

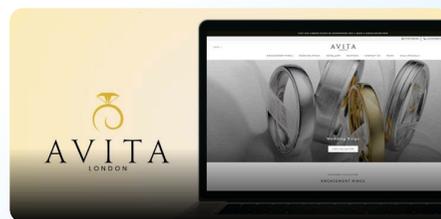

An industrial supply eCommerce platform, developed on Magento with scalable architecture and optimized performance to support B2B product sales.

E commerce Development

A luxury eCommerce platform for jewelry retailers, developed with elegant UI, secure checkout, and scalable architecture to enhance premium shopping experiences.

A business growth consulting platform, redesigned with improved user journeys and scalable architecture to strengthen engagement and lead generation.

A global hair product eCommerce platform, rebuilt with performance optimization and scalable infrastructure to improve conversions and customer engagement.

Our Work Process

Discovery & Requirements

We collaborate with stakeholders to understand objectives, users, data, and automation opportunities.

Architecture & Planning

We design scalable architectures, select technologies, plan integrations, and define security benchmarks.

UI/UX Design

We create intuitive user-centered interfaces through research, prototyping, and usability testing.

Development

We build secure, scalable solutions using agile methods, modern frameworks, and CI/CD pipelines.

Quality Assurance

We conduct functional, performance, and security testing, ensuring reliability and system stability.

Deployment & Maintenance

We manage releases, monitor performance, optimize continuously, and provide ongoing support.
